

Open source intelligence project

OSINT (Open-source intelligence)

OSINT Framework, as its name implies, is a cybersecurity framework, a collection of OSINT tools to make your intel and data collection tasks easier.

This tool is mostly used by security researchers and penetration testers for digital footprinting, OSINT research, intelligence gathering, and reconnaissance.

It provides a simple web-based interface that allows you to browse different OSINT tools filtered by categories.

It also provides an excellent classification of all existing intel sources, making it a great resource for knowing what infosec areas you are neglecting to explore, or what will be the next suggested OSINT steps for your investigation.

OSINT Framework is classified based on different topics and goals. This can be easily seen while taking a look at the OSINT tree available through the web interface

Tasks:

- Gathering basic organization information like name, address, and location from open sources tools and techniques.**

We can get the simple information by searching and surfing on internet through different techniques and search engines.

Target: <https://imarticus.org/>

We can see here we get the simple and basic information using only one word search.

●Gathering information from social media like Twitter Facebook Google Instagram Pinterest Reddit LinkedIn Snapchat WhatsApp Skype Telegram and dating sites and should be able to convert and connect it for making intelligent information.

We can use different social media platforms for gathering information about organizations and employee.

Linkedin:

The image shows a LinkedIn company profile for 'Imarticus Learning'. At the top, there's a banner with the text 'Developing The Leaders Of Tomorrow By Delivering Purposeful Learning Experiences' and a teal-colored logo featuring a stylized 'I' with wings. Below the banner, the company name 'Imarticus Learning' is displayed in bold black text, followed by 'Education Administration Programs' and 'Mumbai, Maharashtra · 36,929 followers'. A brief description states 'EdTech company that creates leading Analytics, Data Science, Finance and Marketing programs.' Two circular profile pictures of people are shown next to the follower count. Below this information are two buttons: a blue 'See jobs' button and a white 'Follow' button with a black outline. The overall background is white with some dark shadows at the bottom.

About Us

Established in September 2012, the firm provides a range of industry-relevant training to meet the skillset requirements of leading companies in the fields of Financial Services and Analytics.

Who We Are

Imarticus Learning offers a comprehensive range of professional Financial Services and Analytics programs that are designed to cater to an aspiring group of professionals who want a tailored program on making them career ready. Our programs are driven by a constant need to be job relevant and stimulating, taking into consideration the dynamic nature of the Financial Services and Analytics market, and are taught by world class professionals with specific domain expertise. Headquartered in Mumbai, Imarticus has classroom and online delivery capabilities across India with dedicated centres located at Mumbai, Bangalore, Chennai, Pune, Hyderabad, Coimbatore and Delhi.

What We Do

Imarticus is the only institute that incorporates a variety of delivery methodologies- classroom based, online and blended, that are managed by a fully integrated state of the art learning management and governance system. Our unique programs also act as a sourcing platform for leading Indian and Global corporates and we offer various customized corporate solutions designed to assist individuals and firms in meeting their human capital requirements.

Here we have the financial and marketplace details of the organizations .

- Collect information about Domain and IP Research, Websites Analysis, Web History, and Website Capture, Wifi Search, and Researching Dark Web.

Domain and Ip

Ip search:

Simple way to identify ip of website is ping the web

```
C:\Windows\System32>ping imarticus.org

Pinging imarticus.org [13.224.20.123] with 32 bytes of data:
Reply from 13.224.20.123: bytes=32 time=991ms TTL=243
Request timed out.
Reply from 13.224.20.123: bytes=32 time=118ms TTL=243
Reply from 13.224.20.123: bytes=32 time=173ms TTL=243

Ping statistics for 13.224.20.123:
    Packets: Sent = 4, Received = 3, Lost = 1 (25% loss),
Approximate round trip times in milli-seconds:
    Minimum = 118ms, Maximum = 991ms, Average = 427ms
```

```
C:\Windows\System32>ping imarticus.com

Pinging imarticus.com [15.197.142.173] with 32 bytes of data:
Reply from 15.197.142.173: bytes=32 time=59ms TTL=117
Reply from 15.197.142.173: bytes=32 time=104ms TTL=117
Reply from 15.197.142.173: bytes=32 time=60ms TTL=117
Reply from 15.197.142.173: bytes=32 time=57ms TTL=117

Ping statistics for 15.197.142.173:
    Packets: Sent = 4, Received = 4, Lost = 0 (0% loss),
Approximate round trip times in milli-seconds:
    Minimum = 57ms, Maximum = 104ms, Average = 70ms
```

Domains:

There are many ways and tools to retrieve information about domain but in this we are going with simple information using <https://urlscan.io/> and <https://sitereport.netcraft.com/>

Web History

We can get the whole web history like at which year and date how it is look like and updates etc..

Waybackmachine:

<https://web.archive.org/>

This is what organization website look like in sep,2018.

- **work with the images to do Image Search and Reverse Image Search, Image Analysis, OCR Tools, and retrieving metadata and geospatial data assumptions**

Image search and Reverse Image Search:

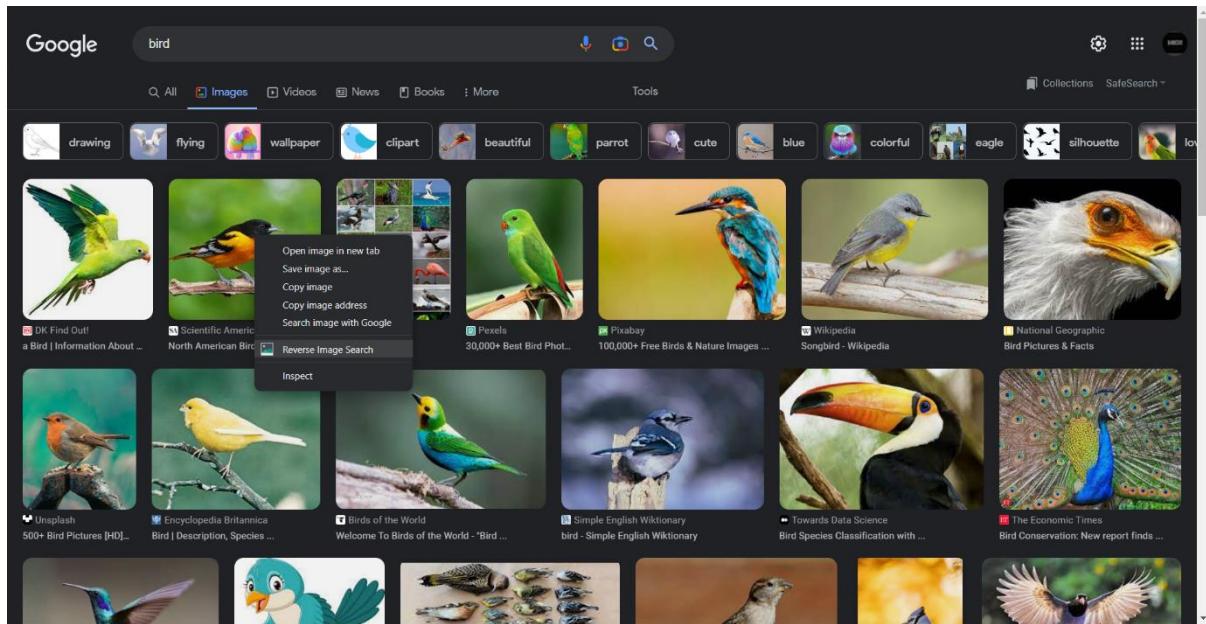

<https://images.search.yahoo.com/>

<https://images.google.com/>

<https://yandex.com/images/>

Through this search engines we can get the images according to our need

We can perform reverse image search using browser extensions

This screenshot shows a detailed view of the Google Images search results for 'bird'. At the top, it displays the search bar with 'bird' and the 'Images' tab selected. Below the search bar, there are filters for 'All', 'Books', 'News', 'Shopping', 'Maps', 'Tools', and 'More'. It also shows that there are about 238 results found in 1.04 seconds. An image of a toucan is highlighted, with its dimensions listed as 275 x 183. Below the image, there's a link to 'Bird - Wikipedia' and a brief description of what birds are. Another link to 'Bird | Description, Species, Classification, Types, & Facts' from Britannica is shown. A section titled 'Visually similar images' displays five more bird images. On the right side, there's a sidebar with a title 'Birds' under 'Animal'. It provides a general description of birds as warm-blooded vertebrates and lists various facts: Clutch size (Peregrine falcon: 3 – 4), Higher classification (Ornithurae), Rank (Class), Scientific name (Aves), Speed (Peregrine falcon: 390 km/h), and Eaten by (Snake, Coyote, Arctic fox). It also lists 'Lower classifications' with links to 'Parrots', 'Birderina', 'Chicken', and 'Owls'. At the bottom left, it says 'Waiting for www.google.com...'. The overall interface is dark-themed.

Metadata:

we can use different types of tools for gathering meta data of image ,videos and pdf etc..

Here we are using the exiftool for gathering meta data of a image

```

Ocr tools:

<https://www.newocr.com/>

<https://www.sodapdf.com/>

<https://www.i2ocr.com/>

Gathering information using ocr tools

Result of image ocr:

The screenshot shows the i2OCR web application interface. At the top, there is a navigation bar with links for Home, Features, FAQ, About, and Contact. Below the navigation bar, there are four buttons: Translate (dropdown), Google Docs, Download (red button), and Copy (green button). On the left side, there is a text area containing transcribed text from an image. The text is as follows:

```
<
yy; Sk My me j iy =
Cae) Vg = "
a - Z aa J i D =< —
= wM
· 2 Re
4 ' SS 4 -
1 ifs $ ee
OSS Sa See x
0 SSG see we Fa
ois ¥ oS = =.
SS = ;
+, x SS — =
» =
```

On the right side, there is a photograph of a ginger cat lying on a white surface. The image has various green annotations overlaid on it, including a yellow bounding box around the cat's head and several green arrows pointing to specific features like the eyes and mouth.

Result of pdf ocr:

The screenshot shows the interface of the "Free Online OCR" tool. At the top, it says "Free Online OCR Convert JPEG, PNG, GIF, BMP, TIFF, PDF, DjVu to Text". Below that is a section for "Recognition language(s) (you can select multiple)" with "English" selected. There are options to "Rotate image" (0°, CCW 90°, 180°, CW 90°) and a checkbox for "Page layout analysis - split multi-column text into columns". Below this is a toolbar with "OCR" (selected) and "Upload New File". The main area displays the scanned text from a document:

To whom it may concern,

We have abducted Gato.

If you want to see Gato again, you need to send us XMR 3.14159; yes, in Monero cryptocurrency.

If you cannot use Monero, we will accept the amount in Bitcoin: BTC 0.0165.

You have 3 days to comply; otherwise, we will send Gato to a very far away animal shelter.

Gato is warm.. for now.

metadata for videos:

<https://mattw.io/youtube-metadata/>

The screenshot shows a dark-themed web application for extracting YouTube metadata. At the top, there's a header with a red '01' button, the text 'YouTube Metadata Normal Bulk', and a 'Dark' toggle switch. Below the header, a message states: 'YouTube Metadata normal grabs singular details about a video and its uploader, playlist and its creator, or channel.' A text input field contains the URL 'https://youtu.be/2etQxbw0AOU'. To the right of the input is a blue 'Submit' button. Underneath the input field, a section titled 'Accepted formats' lists various URL patterns. Below this, a section titled 'Export & Share' includes buttons for 'Export' and 'Import', and a note about saving results as zip files. At the bottom, it says 'Contains file(s)' followed by a list of file types: 'about.txt', 'video.json', 'playlist.json', 'channel.json', 'filmo.json', and '*-thumb.png'.

01 YouTube Metadata Normal Bulk

YouTube Metadata normal grabs singular details about a video and its uploader, playlist and its creator, or channel.

Submit a link or id to a video, playlist, or channel

https://youtu.be/2etQxbw0AOU
